

Stainless Steel Coffee Urn

This stainless steel coffee urn is perfect for brewing large quantities of coffee for events, offices, or catering. It features a durable stainless steel construction, a water level gauge, and a non-drip faucet.

Product Overview

Professional Beverage Solution

This stainless steel coffee urn is designed for high-volume coffee service, making it an ideal choice for offices, events, and catering businesses. Its robust construction ensures durability, while the integrated keep-warm function maintains the perfect temperature for extended periods. With a user-friendly design including a water level gauge and non-drip faucet, it provides both efficiency and ease of operation for professional settings.
