

Stainless Steel Digital Platform Scale

This platform scale is constructed from stainless steel for durability in demanding environments. It features a digital display unit on a vertical support for clear weight readings.

Product Overview

Industrial Stainless Steel Precision

This stainless steel digital platform scale is engineered for high-performance weighing in harsh environments, including food processing, pharmaceutical, and chemical industries. With an IP67 protective rating and corrosion-resistant load cell technology, it ensures reliability and accuracy under adverse conditions. The unit features an adjustable 90-degree display angle and a lightweight, portable structure for maximum operational flexibility.

Technical Specifications

Capacity and Precision

60 kg

Max Capacity (Option A)

150 kg

Max Capacity (Option B)

20 g

Division (Option A)

50 g

Division (Option B)

Platform Size

500 x 370 mm

Construction & Design

Display Configuration

- 6-digit 20mm LCD display
- 6-digit status display
- Adjustable display angle up to 90 degrees

Materials and Construction

Full Stainless Steel, Column Type, IP67 Protection

Industry Applications

Ideal For

Food Industry • Medicine • Aquatic Products • Chemical Industry
