

Stainless Steel Discus Padlock

This discus padlock is made of stainless steel for corrosion resistance. Its circular design minimizes shackle exposure, enhancing protection against cutting and prying.

Product Overview

High-Security Discus Lock

This stainless steel discus padlock is engineered for maximum protection against theft and unauthorized access in demanding environments. Its circular design significantly minimizes shackle exposure, effectively deterring cutting and prying attempts. The high-grade stainless steel body ensures exceptional corrosion resistance, making it suitable for both indoor and outdoor security applications.

Technical Specifications

Body Material	Stainless Steel
Mechanism Type	Precision Pin Tumbler
Design Features	Corrosion Resistant, High-Security, Weather Resistant, Minimal Shackle Exposure

Usage and Compatibility

Recommended Uses

- Security Gates
- Storage Units
- Outdoor Sheds
- General Asset Protection

Included Components	Multiple keys provided
