

# Stainless Steel Ducted Range Hood

This stainless steel range hood is designed for kitchen ventilation. It features a ducted design to remove smoke, grease, and odors, and includes integrated lighting and a multi-speed fan.

## Product Overview

### Professional Kitchen Ventilation Solution

This high-quality stainless steel ducted range hood provides efficient smoke, grease, and odor removal for professional and residential kitchens. Engineered for wall-mounted installation above a cooktop, it ensures a cleaner cooking environment while maintaining high airflow performance. The unit features integrated lighting for superior visibility and a multi-speed fan system to adapt to various culinary demands.
