

Stainless Steel Electric Kettle

This electric kettle is constructed from stainless steel and features a visible water level indicator. It is designed for rapid and efficient water boiling in both household and office settings.

Product Overview

HK-3008 Electric Kettle Series

The HK-3008 electric kettle combines durable stainless steel construction with a modern, functional design suitable for both home and office environments. Featuring an integrated water level indicator, this appliance allows for precise volume measurement to ensure efficient boiling. Its sleek aesthetic, accented by a black handle and base, makes it a reliable and stylish addition to any kitchen or breakroom.
