

Stainless Steel Electric Kettle

This electric kettle is constructed from stainless steel with black plastic accents on the handle, base, and lid. Designed for rapid water boiling, it is suitable for household use in kitchens and pantries.

Product Overview

Efficient Stainless Steel Kettle

This stainless steel electric kettle is engineered for rapid water boiling, making it an ideal choice for busy kitchens and pantries. Its durable construction features a heat-resistant black plastic handle, base, and lid for safe handling. The design includes a precision triangular spout for easy pouring and a convenient power indicator light on the base for operational clarity.
