

Stainless Steel Electric Water Pump

This water pump is designed for efficient water transfer and pressure boosting. Its durable stainless steel body and robust electric motor make it suitable for irrigation, domestic water supply, and industrial processes.

Product Overview

High-Performance Water Transfer Solution

This stainless steel electric water pump is precision-engineered for efficient water transfer and reliable pressure boosting. Designed for versatility, it is an ideal choice for domestic water supply, agricultural irrigation, and demanding industrial processes. Its robust construction and quiet operation ensure long-term performance and minimal maintenance requirements.

Technical Specifications

Build Material	Stainless Steel
Ideal Applications	Irrigation, Domestic Water Supply, Industrial Processes, Pressure Boosting

Key Features

Core Benefits

- Durable stainless steel pump body
- Robust high-performance electric motor
- Compact and space-saving design
- Engineered for quiet operation
- High reliability and longevity
