

Stainless Steel Electric Wax Melter Dispenser

This stainless steel electric wax melter urn ensures efficient and precise wax melting. It features a digital control panel, a dispensing spigot, and convenient handles for safe and easy transport.

Product Overview

Professional Stainless Steel Wax Melter

This high-efficiency electric wax melter is engineered for professional and home use, featuring a durable double-wall stainless steel construction. It provides precise temperature control and safety features like boil-dry and overheat protection to ensure reliable operation. Designed for convenience, it includes a non-drip dispensing tap and heat-resistant handles, making it an ideal solution for cafes, hotels, and craft applications.

Key Features

Core Performance

304 SS

Inner Material

201 SS

Outer Material

Construction & Design

Build Quality

- Double-wall insulation for heat retention
- High-quality stainless steel (304 Inner / 201 Outer)
- Steel top cover
- Heat-resistant strong plastic handles
- Water level gauge for easy measuring

Operation & Safety

User Interface

- ON/OFF power switch
- Dedicated 'HEAT' indicator light
- Dedicated 'KEEP WARM' indicator light
- Optional temperature controller
