

Stainless Steel Exhaust System

This stainless steel exhaust system improves exhaust flow for enhanced engine performance. It is constructed from SS201 or SS304 stainless steel for corrosion resistance and durability.

ADDITIONAL IMAGES

Product Overview

High-Performance Exhaust Engineering

This stainless steel exhaust system is engineered for optimal exhaust flow and improved engine performance across various automotive applications. Constructed from durable T304 stainless steel, the system offers superior corrosion resistance and longevity. Featuring mandrel-bent tubing for smooth transitions and maximum exhaust velocity, it is designed to deliver both enhanced sound and aggressive styling.

Technical Specifications

Included Components

- Exhaust manifold
- Mid-pipe
- Muffler
- Mounting clamps
- Exhaust tips

Material	T304 Stainless Steel
Construction Features	Mandrel-bent tubing, Corrosion-resistant, Bolt-on installation

Performance & Application

Key Performance Metrics

1 Optimized

Engine Performance

1 Maximized

Exhaust Flow

Industry Applications

Automotive • Marine • Tuning & Performance
