

Stainless Steel Flange

This stainless steel flange is designed for connecting pipes and components in various piping systems. The flange is made from stainless steel, which provides excellent corrosion resistance and long-lasting durability.

Product Overview

Industrial Stainless Steel Flange

This high-quality stainless steel flange is engineered for reliable connectivity in demanding piping systems. Featuring a precision-machined circular design with four uniform bolt holes, it ensures a secure and leak-resistant fit. The robust stainless steel construction provides excellent corrosion resistance and long-term durability in industrial environments.

Technical Details

Material Composition	Stainless Steel
Bolt Holes	4
Surface Finish	Machined smooth

Features

Key Attributes

Corrosion Resistant • High Durability • Industrial Grade
