

# Stainless Steel Food and Beverage Mixing Tank

This stainless steel mixing tank is designed for food, beverage, and cereal processing. It features a cylindrical body with a conical bottom, supported by three legs, and a top-mounted mixer with multiple ports.

## Overview

### Industrial Mixing Solution

This stainless steel mixing tank is specifically engineered for high-demand food, beverage, and cereal processing environments. It features a robust cylindrical body with a conical bottom design to facilitate efficient discharge and cleaning. Equipped with a top-mounted mixer and multiple connection ports, this unit offers the versatility and durability required for consistent industrial production.

## Technical Specifications

### Suitable Applications

- Food Processing
- Beverage Production
- Cereal Manufacturing

### Key Components

Motorized Mixer • Process Ports • Support Legs

<b>Material</b>	Stainless Steel
<b>Design Features</b>	Cylindrical Body, Conical Bottom, 3-Leg Support, Top-Mounted Mixer
