

Stainless Steel Foot Valve with Strainer

This foot valve prevents backflow in pumping systems. Constructed from SCS13 stainless steel, it offers durability and corrosion resistance with a flanged connection and integrated inlet strainer.

Product Overview

Industrial Foot Valve Performance

This JIS standard foot valve is engineered for high-performance backflow prevention in demanding pumping systems. Constructed from robust SCS13 stainless steel, the valve offers exceptional corrosion resistance and long-term durability. It features a secure flanged connection and an integrated strainer, which effectively prevents debris from entering the pump to maintain optimal system efficiency.

Technical Specifications

Pressure Rating

10K

Material Grade

SCS13, SCS14, WCB

Connection Type

Flange

Standard

JIS

Key Features

Design Highlights

- Integrated inlet strainer
- Backflow prevention
- Corrosion-resistant stainless steel
- Flanged installation
