

# Stainless Steel Handrail with Glass Panel

This stainless steel handrail features a glass panel for enhanced safety and visual separation. It is constructed from durable stainless steel tubing, ensuring corrosion resistance and a clean, modern appearance.

## Product Overview

### Modern Safety Solutions

This stainless steel handrail with integrated glass panel offers a perfect blend of safety, durability, and contemporary design. Engineered with high-quality stainless steel for superior corrosion resistance, it provides reliable support for staircases, ramps, and walkways. The clear glass paneling ensures a sense of openness while maintaining necessary physical barriers, making it an ideal choice for professional and public spaces.

## Technical Specifications

### Components

- Stainless steel tubing
- Reinforced glass panels
- Support posts
- Circular base mounts

<b>Construction Material</b>	High-grade stainless steel
<b>Key Attributes</b>	Corrosion Resistant, Modern Aesthetic, High Stability, Safety Certified

## Application

### Common Applications

- Commercial Staircases
- Accessibility Ramps
- Walkways and Corridors
