

# Stainless Steel Hemisphere

This hemisphere is made of stainless steel. It is suitable for pressure vessels, tanks, and custom fabrication projects.

## Product Overview

### Industrial Precision Hemisphere

This high-grade stainless steel hemisphere is precision-engineered for demanding industrial and scientific environments. Designed for superior corrosion resistance and durability, it features a smooth, polished surface finish suitable for high-precision applications. It serves as an essential component for pressure vessels, tanks, custom fabrication projects, and as a versatile industrial mold.

## Technical Specifications

Material Type	High-grade Stainless Steel
Surface Finish	Polished
Key Attributes	Corrosion Resistant, Precision-Engineered, Smooth Finish

## Applications

### Typical Industrial Uses

- Pressure vessels
- Storage tanks
- Custom metal fabrication
- Industrial molding
- Component assembly
