

Stainless Steel Hydraulic Ball Valve

This hydraulic ball valve is constructed from stainless steel for durability and corrosion resistance. It provides reliable shut-off and control in hydraulic systems used across industrial, mobile, and agricultural applications.

Overview

High-Performance Stainless Steel Hydraulic Ball Valves

These high-pressure hydraulic ball valves are constructed from durable stainless steel, engineered for reliable shut-off and fluid control in demanding hydraulic systems. Designed for versatility, they support a wide range of industrial, mobile, and agricultural applications. They are fully compatible with hydraulic oil, water, and other compatible fluids, ensuring smooth operation and long-term corrosion resistance.

Technical Specifications

Port Configurations

- 2-way
- 3-way
- 4-way

Material Options

304 Stainless Steel, 316 Stainless Steel, 316Ti Stainless Steel

Application Details

Compatible Fluids

Hydraulic Oil • Water

Target Industries

Industrial, Mobile Hydraulics, Agricultural
