

# Stainless Steel Industrial Clamp

This stainless steel clamp features a smooth outline and compact structure. It provides a flexible sealant for a wide range of applications.

## Product Overview

### High-Performance Industrial Clamping Solution

This stainless steel industrial clamp is designed for secure and reliable connections in demanding industrial environments. Featuring a robust 316L stainless steel flange and an advanced anti-static silicone compensator, it provides exceptional durability and chemical resistance. The design eliminates the need for external grounding lugs, ensuring a safe and efficient connection for various machinery applications.

## Material Composition

Construction Materials	316L Stainless Steel, Platinum-cured Silicone, PTFE (Teflon) Lining
------------------------	---

## Compliance and Safety

### Regulatory Standards

FDA Compliant (CFR 177.2600) • USDA Quality • Anti-Static

## Design Features

### Key Technical Features

- Chemical resistant PTFE lining
- Automatic grounding system
- No external grounding straps required
- Robust corrosion-resistant construction
- Leak-proof sealing performance
