Product Overview

Industrial Grade Johnson Strainer Screens

These precision-engineered stainless steel Johnson strainer screens are designed for high-efficiency filtration and separation across demanding industrial environments. Built for durability, they offer superior resistance to corrosion and abrasion while maintaining consistent performance in challenging conditions. The robust construction ensures long-lasting reliability for mission-critical applications such as water wells, oil extraction, and gas processing.

Key Features

Suitable Applications

Water Wells, Oil & Gas Extraction, Industrial Filtration, Separation Processes

Technical Specifications

Material Characteristics

- High-grade stainless steel construction
- Excellent corrosion resistance
- Abrasion-resistant design
- Precision-engineered slot openings

Performance Metrics

100 %

Filtration Efficiency

5 Stars
