

Stainless Steel Machine Hardware Component

This is a stainless steel machine hardware component. It has dimensions of 200mm width, 85mm height, and 140mm total length.

Product Overview

High-Performance Stainless Steel Component

This durable stainless steel machine hardware component is engineered for precision and longevity in industrial or automotive applications. Featuring robust construction and precise dimensions, it is designed to meet demanding operational requirements. Its versatile build makes it an ideal solution for exhaust systems or similar mechanical assemblies requiring high-grade material integrity.

Physical Dimensions

Main Dimensions

200 mm

Width

85 mm

Height

140 mm

Length

Detailed Technical Specifications

Parameter	Dimension	Unit
Overall Length	250	mm
Overall Height	73	mm
Overall Width	185	mm
Mounting Bracket Width	53	mm
Mounting Bracket Length	80	mm
Mounting Bracket Height	72	mm

Material & Identification

Material

Stainless Steel

Model Identifier

HJ-7
