

# Stainless Steel Manual Ball Valve

This stainless steel manual ball valve is suitable for use with water, air, oil, and corrosive mediums. It is available with flanged or threaded connections and is designed for manual operation.

## ADDITIONAL IMAGES

## Product Overview

### Industrial Stainless Steel Ball Valve

This high-performance manual ball valve is engineered from acid and alkaline resistant stainless steel, making it an ideal solution for handling water, air, oil, and various corrosive chemical mediums. Featuring a robust design available in both flanged and threaded configurations, it provides reliable flow control for low-viscosity fluid applications. The valve is built for durability and ease of maintenance, ensuring long-term service in demanding industrial environments.

## Technical Specifications

### Operating Pressure

**1.6 MPa**

Max Pressure

### Protection Rating

IP65

### Available Nominal Sizes

DN20 - DN80

### Material Options

304 Stainless Steel, 316 Stainless Steel

### Operating Temperature

1 - 100°C

## Configuration Options

Flanged connection model designed for secure installation.

Threaded end connection model for versatile industrial use.

### Supported Connections

- Flange Connection
- Threaded End Connection
