

Stainless Steel Phillips Pan Head Self-Drilling Screw

This stainless steel Phillips pan head self-drilling screw is designed for efficient and secure fastening. The self-drilling point eliminates the need for pre-drilling.

Product Overview

Professional Self-Drilling Solutions

These stainless steel Phillips pan head self-drilling screws are engineered for maximum efficiency in metal fabrication, construction, and assembly tasks. Featuring a specialized self-drilling point, these screws eliminate the requirement for time-consuming pre-drilling. The pan head design ensures a secure grip for drivers while providing a clean, professional finish upon installation.

Technical Specifications

Drive Style	Phillips
Head Shape	Pan Head
