Product Overview

Industrial Stainless Steel Flanges

These high-grade stainless steel flanges are precision-engineered to provide robust and reliable connections in demanding industrial piping systems. Manufactured to meet international standards including ANSI, DIN, JIS, and BS, they offer excellent corrosion resistance and durability. They are ideal for diverse applications such as chemical processing, oil and gas, and water treatment, ensuring a secure and leak-proof seal.

Technical Specifications

Flange Configurations

- Welding Neck Flanges
- Slip-On Flanges
- Lap Joint Flanges
- Threaded Flanges
- Socket Welding Flanges
- Blind Flanges

Manufacturing Method

Forged • Casting

Material Composition

304, 304L, 316, 316L, Carbon Steel

Dimensions and Standards

Size Availability

DN15 (1/2") to DN5000 (200")

International Standards

ANSI, DIN, JIS, BS

Logistics

Packaging Options

- Wooden cases
- Wooden pallets
- Custom requirements
