

Stainless Steel Pipe Reducer Fitting

This fitting connects pipes of different sizes. It is made from 304L stainless steel, offering excellent corrosion resistance and durability.

Product Overview

Professional Stainless Steel Pipe Reducer

This stainless steel pipe reducer is a precision-engineered fitting designed to seamlessly connect pipes of differing diameters within a piping system. Manufactured from high-quality 304L stainless steel, the component provides superior corrosion resistance and long-term durability in demanding environments. It is an essential solution for maintaining optimal flow rates and adapting system layouts across various industrial plumbing applications.

Technical Specifications

Material Grade

304L Stainless Steel

Part Details

- Model: 28773
- Dimension: 1½ inch
- Grade: 405

Corrosion Resistance

Yes

Primary Application

Plumbing and industrial piping systems
