

Stainless Steel Pipe Repair Clamp

This stainless steel pipe repair clamp is designed for quick and effective repairs of damaged pipes. It features a robust stainless steel band and a secure fastening mechanism.

Product Overview

Reliable Pipe Repair Solution

This stainless steel pipe repair clamp is engineered for rapid and effective sealing of damaged pipelines. Featuring a robust stainless steel band and a secure fastening mechanism with high-strength bolts and a pressure plate, it ensures a tight, durable seal. It is a versatile solution suitable for various pipe materials, making it an essential tool for emergency repairs and routine maintenance tasks.

Technical Specifications

Key Design Features

- Robust stainless steel band
- Secure bolt-fastening mechanism
- Pressure plate for uniform sealing
- Compatible with multiple pipe materials

Material	Stainless Steel
Suitable Applications	Emergency Repair, Pipeline Maintenance, Leak Sealing
