Product Overview

Industrial-Grade Versatility

Our collection of stainless steel pipes offers high-quality solutions for diverse industrial applications including chemical processing, hydraulic systems, and heat exchangers. Engineered for superior corrosion resistance and high durability, these products are built to withstand the most demanding environments. We provide a comprehensive range of seamless and welded options, including mirror-finished pipes for sanitary use and decorative tubes to meet specific project needs.

Product Range

Available Varieties

Seamless Pipes, Welded Pipes, Hydraulic Tubes, Boiler & Heat-Exchanger Tubes, Duplex Tubes, U-bent Tubes, Capillary Tubes, Mirror/Sanitary Pipes, Decorative Tubes, Long Products

Technical Dimensions

Available Flat Bar Sizes (mm)

- 12x50
- 12x60
- 12x71
- 12x80

Applications

Recommended Sectors

Chemical Processing • Food & Beverage • Pharmaceutical • Oil & Gas • Water Treatment • General Machinery
