

Stainless Steel Platform Handcart

This stainless steel handcart is equipped with two handles for ease of maneuvering. It is designed for the transportation of cargo in various settings.

Product Overview

Industrial Stainless Steel Handcart

This durable stainless steel platform handcart is designed for efficient material handling in industrial and commercial environments. The robust construction features a knock-down design for easy transport and storage, while the specialized caster system ensures quick assembly and smooth maneuverability. Enhanced with a secure locking drawer mechanism, this cart provides both heavy-duty utility and professional-grade security for your logistics needs.

Design and Build

Structure	Knock down structure
Material	Stainless Steel

Features

Integrated Storage
