

Stainless Steel Press Fitting Tee Connector

This stainless steel tee connector facilitates the connection of three pipes in plumbing systems. It is designed for use with compatible press fitting tools to ensure a secure and leak-proof seal.

Product Overview

Professional Plumbing Solution

This stainless steel press fitting tee connector is engineered for high-performance plumbing systems, facilitating the secure joining of three pipe segments. Designed with a durable, brushed metallic finish, it incorporates specialized white plastic rings at each connection point to ensure a reliable, leak-proof seal. It is fully compatible with standard press fitting tools, offering professional installers an efficient and robust connection method for critical infrastructure.

Technical Specifications

Sealing Feature

Leak-proof seal • Integrated sealing rings

Material	Stainless Steel
