

# Stainless Steel Pressure Sprayer

This steel pressure sprayer is designed for various spraying applications. It features a durable stainless steel tank, a pressure gauge for monitoring internal pressure, and a hand-operated pump for easy pressurization.

## Product Overview

### Professional Stainless Steel Pressure Sprayer

This industrial-grade stainless steel pressure sprayer is engineered for versatility in agricultural, gardening, and industrial environments. It features a robust tank construction for long-term durability and is equipped with an integrated pressure gauge for precise operational monitoring. The design includes safety-focused features such as a pressure release valve and a user-friendly hand-operated pump system.

## Technical Specifications

Tank Material	Stainless Steel
Operation Mode	Hand-operated pump
Safety Equipment	Pressure Gauge, Pressure Release Valve
Spray Control	Adjustable nozzle

## Application Areas

### Suitable Environments

- Gardens
- Farms
- Industrial Settings
