

Stainless Steel Putty Knife with Wooden Handle

This putty knife features a broad, flexible blade that ensures smooth application and spreading of materials. The wooden handle is ergonomically designed for a comfortable grip and precise control.

Product Overview

Professional Grade Putty Knife

This stainless steel putty knife is engineered for high-performance surface preparation and material application. Featuring a flexible blade for superior control, it allows for smooth spreading and efficient scraping tasks. The integrated wooden handle provides an ergonomic grip designed to minimize fatigue during extended use in professional environments.
