

Stainless Steel Rectangular Tubing

High-strength stainless steel rectangular tubing is designed for structural applications. The tubing features precise dimensions, corrosion resistance, and a smooth surface finish.

Product Overview

Professional Grade Stainless Steel Rectangular Tubing

These stainless steel rectangular tubes are engineered for high performance in structural and architectural applications. Offering a wide range of custom dimensions and surface finishes, they provide both the durability required for engineering projects and the aesthetic versatility needed for design-driven installations. Each pipe is manufactured to meet precise thickness and length requirements to ensure seamless integration into your project.

Technical Specifications

Common Dimension Profiles

- 20x10mm
- 23x11mm
- 24x12mm
- 25x13mm
- 28x13mm
- 30x15mm
- 34x22mm
- 36x23mm
- 37x24mm
- 38x25mm
- 40x20mm
- 48x23mm
- 50x15mm
- 50x25mm
- 60x15mm
- 60x30mm
- 73x43mm
- 75x45mm
- 95x45mm

Customization

Custom dimensions available • Custom length available • Custom thickness available

Thickness Range	0.23 mm
Standard Length	6 m
Surface Finish Options	2B, BA, No.1, No.4, No.8, Mirror, 8K, Brush, Bright, Hairline, Embossed, Titanium Coated
