

Stainless Steel Reducer

This stainless steel reducer is designed to meet IP69K certification standards for the food industry. It offers exceptional corrosion resistance, a long service life, and requires minimal maintenance.

Product Overview

High-Performance Stainless Steel Reducer

This stainless steel reducer is engineered for demanding industrial environments where hygiene and durability are paramount. Its robust construction provides exceptional corrosion resistance, making it an ideal choice for food processing, pharmaceutical, and chemical manufacturing applications. Designed for efficient power transmission, this unit reliably reduces speed while increasing torque to ensure stable performance and minimal maintenance.

Technical Specifications

Key Performance Metrics

0.18 kW Min Input Power	7.5 kW Max Input Power	26 N.m Min Output Torque	670 N.m Max Output Torque
-----------------------------------	----------------------------------	------------------------------------	-------------------------------------

Model Series	37~67
Gear Ratio Range	3.41 to 199.81

Application Suitability

Material Benefits

Corrosion Resistant • Stainless Steel • Hygienic Design

Recommended Industries	Food Processing, Pharmaceuticals, Chemical Manufacturing
------------------------	--
