

Stainless Steel Sheets with Varied Surface Finishes

These stainless steel sheets are available in multiple surface finishes such as 2B, BA, No.4, and 8K mirror. They come in thicknesses ranging from 0.20-3.0 mm and widths up to 1219mm, accommodating various project requirements.

Product Overview

Professional Stainless Steel Solutions

These stainless steel sheets offer exceptional versatility for diverse industrial, construction, and engineering applications. Engineered for durability and superior corrosion resistance, the product features a wide array of high-quality surface finishes to meet precise aesthetic and functional requirements. Each sheet is meticulously prepared for export, ensuring structural integrity and protection during international transit.

Dimensions & Physical Properties

Thickness Range	0.2 mm
Maximum Thickness	3 mm
Available Widths	25 - 1219 mm
Custom Lengths	Up to 4 meters or custom requirements

Surface Finishes

Titanium Coatings

Black • Gold • Rose-Gold

Surface Finish Types	2B, BA, No.1, No.4, No.8, Mirror, 8K, Brush, Hairline, Linen/Embossed
