

Stainless Steel Sprocket with 5/8" Pitch, 30 Teeth

This stainless steel sprocket features a 5/8" pitch and 30 teeth. It is designed for reliable power transmission and long-lasting performance in demanding applications.

Product Overview

High-Performance Stainless Steel Sprocket

This 50B30SS sprocket is precision-engineered with a 5/8" pitch and 30 teeth to ensure reliable power transmission in demanding industrial applications. Manufactured from high-quality stainless steel, it is specifically designed to excel in corrosive environments where durability is paramount. Its robust construction provides high strength and smooth operation, significantly reducing wear and maintenance requirements over time.

Key Metrics

Primary Specifications

0.625 in

Pitch

30 T

Teeth Count

Technical Specifications

Pitch Size	5/8"
Number of Teeth	30
Model Code	50B30SS
Chain Size	No. 50

Material & Durability

Material

Stainless Steel

Performance Features

- Corrosion resistant
- High strength construction
- Precision-engineered for smooth operation
- Designed for minimal wear

Applications

Ideal Applications

Corrosive Environments, Power Transmission, High-Durability Requirements, Industrial Machinery
