

Stainless Steel Storage Box

This stainless steel storage box is durable and ideal for applications requiring corrosion resistance and hygiene. It features a smooth, seamless construction for easy cleaning and maintenance.

Product Overview

Professional Stainless Steel Storage Solution

This durable stainless steel box is engineered for environments requiring strict hygiene standards and high corrosion resistance. Featuring a seamless construction with rounded corners, the unit is designed for effortless cleaning and maintenance in industrial or laboratory settings. Its versatile design makes it an ideal choice for the safe storage, containment, and transport of materials.

Technical Details

Key Features

- Seamless construction
- Rounded corners
- Uniform depth
- High durability

Material	Stainless Steel, Corrosion Resistant
-----------------	--------------------------------------

Application Suitability

Industry Applications

Food Processing • Laboratory • Industrial • Storage & Transport
