

# Stainless Steel Submersible Borehole Pump for Deep Wells

This submersible borehole pump is designed for water supply from wells or reservoirs. It is suitable for domestic, civil, industrial, garden, and irrigation applications.

## Overview

### High-Performance Submersible Borehole Pump

This stainless steel submersible pump is engineered for reliable water supply from deep wells and reservoirs. Designed to withstand demanding environments, it is suitable for a wide range of domestic, civil, and industrial applications, including garden irrigation systems. With robust construction and flexible power options, it provides a consistent and efficient solution for professional water extraction needs.

## Operating Conditions

### Performance Metrics

<b>35 °C</b> Max Fluid Temp	<b>50 m</b> Max Immersion Depth	<b>0.15 %</b> Max Sand Content	<b>130 mm</b> Min Well Diameter
--------------------------------	------------------------------------	-----------------------------------	------------------------------------

## Technical Specifications

### Electrical Configuration

Type	Voltage / Frequency
Single-phase	220V - 240V / 50Hz
Three-phase	380V - 415V / 50Hz

### Pump Features

- Rewindable motor
- Start control box or digital auto-control box compatible
- Floating switch option available
- Curve tolerance per ISO 9906

### Warranty

2 years

## Certifications

### Compliance & Standards

CE • ISO 9001 • CCC • GS • RoHS
