Product Overview

High-Efficiency Stainless Steel Submersible Pump

This durable stainless steel submersible pump is engineered for reliable water extraction from deep wells, boreholes, and reservoirs. Its corrosion-resistant construction ensures longevity, while the slim cylindrical design facilitates easy installation within narrow well casings. The unit is ideal for versatile professional applications, including agricultural irrigation, domestic water supply systems, and industrial dewatering.

Technical Specifications

Material	Stainless Steel
Key Features	Corrosion Resistant, Submersible, Cylindrical Design, Perforated Intake

Application Suitability

Suitable Applications

- Agricultural Irrigation
- Domestic Water Supply
- Industrial Water Extraction
- Dewatering
