

Stainless Steel Swing Check Valve

DN15-400

This stainless steel swing check valve prevents backflow in pipelines. It is designed for durability and corrosion resistance, suitable for water, oil, gas, and chemical processing.

Product Overview

Industrial Swing Check Valve

This high-quality stainless steel swing check valve is engineered for reliable backflow prevention in demanding industrial pipeline systems. Designed to allow flow in a single direction, it automatically seals upon flow reversal to protect downstream equipment. Its robust stainless steel construction ensures long-term durability and resistance to corrosion, making it an ideal choice for water, oil, gas, and chemical processing environments.

Technical Specifications

Pressure Rating

80 PN

Nominal Rating

Size Range (DN)	15-400
Body Material	Stainless Steel
Manufacturing Standard	GB Standard
