

Stainless Steel Swivel with Eye and Jaw

This swivel is made from stainless steel for corrosion resistance and durability. It is designed for smooth rotation and secure connections in marine, industrial, and rigging applications.

Product Overview

Professional Grade Stainless Steel Swivel

This durable swivel features a versatile eye-and-jaw configuration designed for reliable performance in rigging, marine, and industrial applications. Engineered for 360-degree rotation, it effectively prevents the tangling and twisting of ropes, cables, and chains. Constructed from high-quality stainless steel, this component provides excellent corrosion resistance and maximum structural strength for demanding environments.

Material Specifications

Material Grade	AISI 304, AISI 316
----------------	--------------------

Key Features

Configuration	Eye and Jaw
Rotation Range	360 degrees
