

Stainless Steel T-Bolt Hose Clamps

Heavy-duty T-bolt hose clamps are constructed from stainless steel. The T-bolt design ensures uniform pressure distribution, preventing leaks and maintaining a secure connection in high-pressure environments.

Product Overview

Heavy-Duty T-Bolt Clamps

These stainless steel T-bolt hose clamps are engineered for high-pressure environments where reliability is critical. The specialized T-bolt design ensures uniform pressure distribution around the hose, effectively preventing leaks and maintaining a secure connection. They are widely utilized across demanding automotive, marine, and industrial applications.

Technical Specifications

Key Benefits

High Pressure Rated • Uniform Pressure Distribution • Leak Prevention

Material	Stainless Steel
Design Type	T-Bolt
Suitable Applications	Automotive, Marine, Industrial
