

Stainless Steel U-Shape Water Dispenser

This water dispenser features a high-efficiency compressor that cools water to between 4 and 6 degrees Celsius. Its stainless steel body ensures durability and a clean aesthetic.

Product Overview

High-efficiency stainless steel water dispenser with hot and cold functionality.

Professional Grade Water Dispenser

This durable water dispenser features a modern stainless steel body designed for both office and home environments. It utilizes a high-efficiency compressor cooling system to provide refreshing cold water, while also offering hot water functionality. Engineered for reliability, this unit combines robust construction with a user-friendly design.
