Product Overview

Industrial Vacuum Packaging Solution

This stainless steel vacuum packaging machine is engineered for high-performance sealing in industrial environments. Featuring a robust, mobile design with caster wheels, it offers excellent maneuverability and durability for heavy-duty applications. The unit is equipped with a precise control panel and pressure gauge, ensuring consistent and reliable vacuum sealing for various packaging needs.

Construction & Design

Material	Stainless Steel
Mobility	Caster Wheels, Mobile Design
Lid Mechanism	Hinged lid with ergonomic handles

Control & Operation

Control System	Integrated control panel with pressure gauge
