

Stainless Steel Water Dispenser with Hidden Bottle and Auto-Clean

This water dispenser features a hidden bottle design and an automatic cleaning system. Its stainless steel construction provides durability while offering hot, cold, and room temperature water.

Product Overview

Modern Water Dispensing Solution

This stainless steel water dispenser features a sleek, hidden bottle design that integrates seamlessly into any professional or home environment. Equipped with an advanced automatic cleaning system, it utilizes ozone technology to sanitize internal pathways and tanks, ensuring optimal water hygiene. The unit offers versatile temperature options, including hot, cold, and room temperature water, making it a convenient and durable choice for daily hydration needs.
