

Stainless Steel Water Transfer Pump

This stainless steel water transfer pump is designed for various water transfer applications. Constructed with a durable stainless steel housing, it ensures longevity and resistance to corrosion.

Overview

Robust Stainless Steel Water Pump

The JDT Stainless Steel Water Pump is a high-performance solution engineered for reliable water transfer in domestic and commercial environments. Featuring a durable stainless steel housing, this pump offers superior corrosion resistance and long-term operational stability. It is an ideal choice for irrigation, boosting water pressure, and general water supply needs, designed for straightforward installation and maintenance.

Technical Specifications

Housing Material	Stainless Steel
Motor Design	Electric motor with ribbed housing
Mounting	Sturdy black base mount

Applications

Primary Applications	Domestic Water Supply, Irrigation, Pressure Boosting
----------------------	--

Key Features

Performance Highlights

1 High

Corrosion Resistance

1 Simple

Installation Ease
