

Stainless Steel Wire Rope 1x19

This stainless steel wire rope is constructed in a 1x19 strand configuration. It is available in 304, 316 and 316L grades.

Overview

High-Performance Stainless Steel Wire Rope

This stainless steel wire rope is engineered for exceptional durability and corrosion resistance, making it an ideal choice for demanding environments. Available in multiple material grades including AISI 304 and 316, it offers superior strength and reliability for critical rigging and construction tasks. With a wide diameter range and various surface treatments, this product is highly adaptable to specific industrial requirements.

Technical Specifications

Tensile Strength

- 1570 N/mm²
- 1670 N/mm²
- 1770 N/mm²

Construction Configurations

1x7, 1x19, 7x7, 7x19, 6x7+FC/IWS, 6x19+FC/IWRC/IWSC, 19x7, 6x37+FC/IWRC, 6x36WS+FC/IWRC

Diameter Range

0.3mm - 32mm

Material & Standards

Material Grades

AISI 304 • AISI 316 • AISI 304L • AISI 316L • Non-magnetic

Surface Treatment

Bright, Annealed, Electro polished

Compliance Standards

AISI, ASTM, DIN, EN12385-4, BS, GB, JIS

Logistics & Usage

Packing Options

- Plywood reels
- Plastic spools

Lay Direction

R.H.O.L and L.H.O.L

HS Code

7312100000

Applications

Rigging, Construction, Aircraft, Metallurgy, Hardware
