

Stainless Steel Wire Rope Clip, U.S. Type

This U.S. type clip securely fastens wire ropes. It is constructed from stainless steel, providing corrosion resistance and durability for marine, industrial, and construction applications.

Product Overview

U.S. Type Stainless Steel Wire Rope Clip

The U.S. Type wire rope clip is a robust solution designed for the secure fastening of wire ropes in demanding environments. Manufactured from high-quality stainless steel, it offers exceptional corrosion resistance and long-term durability. This clip is ideal for marine, industrial, and construction applications where maintaining the integrity and safety of the wire rope assembly is critical.

Material Specifications

Available Materials

AISI 304, AISI 316

Key Features

Performance Attributes

- Excellent corrosion resistance
- High-strength secure fastening
- Slip-prevention design
- Suitable for harsh industrial and marine environments
- Easy and reliable installation
