

Stainless Steel Wire Rope (SS 304/SS 316)

This stainless steel wire rope is available in SS 304 and SS 316 grades. It is suitable for rigging, hoisting, and marine environments.

Product Overview

Versatile Stainless Steel Wire Rope

This premium stainless steel wire rope is engineered for exceptional durability and corrosion resistance in demanding professional environments. Available in multiple construction configurations and material grades, it provides reliable performance for rigging, construction, and marine applications. Each unit is manufactured to international standards to ensure consistent tensile strength and structural integrity.

Technical Specifications

Tensile Strength Options

- 1570 N/mm²
- 1670 N/mm²
- 1770 N/mm²

Surface Treatment

Bright • Annealed • Electro polished

Material Grades

AISI 304, AISI 316, AISI 304L, AISI 316L

Diameter Range

0.3mm - 32mm

Compliance and Standards

Certified Standards

AISI, ASTM, DIN, EN12385-4, BS, GB, JIS

HS Code

7312100000

Logistics and Application

Typical Applications

- Rigging
- Construction
- Aircraft
- Metallurgy
- Hardware

Packaging Methods

Plywood reels, Plastic spools
