

# Stamped Metal Parts for Circuit Breakers

**SOOT**

These precision-stamped metal parts are used in miniature circuit breakers (MCCB) and residual current circuit breakers (RCCB). The components are manufactured to exacting standards to ensure reliable performance.

## ADDITIONAL IMAGES

## Overview

### Precision Stamped Metal Components

These precision-engineered metal stamping parts are designed specifically for circuit protection devices, including miniature circuit breakers (MCCB) and residual current circuit breakers (RCCB). Manufactured to exacting tolerances, these components ensure reliable operation and long service life within critical electrical systems. The parts are available in various material compositions and finishes, providing optimal electrical conductivity and corrosion resistance for demanding industrial applications.

## Technical Specifications

<b>Working Life</b>	10000 cycles
<b>Voltage Rating</b>	AC 250V
<b>Pin Configuration</b>	1-10 Pins
<b>Material</b>	Metal
<b>Surface Treatments</b>	Zinc Plated, Nickel Plated, Tin Plated, Brass Plated, Silver Plated, Gold Plated, Anodizing

## Commercial Details

### Shipping Ports

- Ningbo
- Shanghai

<b>Minimum Order Quantity</b>	10000
<b>Standard Delivery Time</b>	3-7 days after payment
<b>Warranty Period</b>	1 Year

## Compliance

### Certifications

ISO 9001-2015 • CQC
