

## Stamping and Punching Processing Parts

These are precision metal parts manufactured through stamping and punching processes. The parts are designed for various applications requiring durable and accurate components.

### ADDITIONAL IMAGES

### Overview

#### Precision Stamping & Punching Solutions

Our precision stamping and punching components are engineered to meet the demanding requirements of the automotive, aerospace, and medical sectors. Using advanced manufacturing processes including CNC machining, laser cutting, and wire EDM, we deliver parts with superior dimensional accuracy and structural integrity. Every component is crafted from high-quality materials such as stainless steel, copper, and aluminum alloys to ensure long-term reliability in critical assemblies.

## Technical Capabilities

<b>Machining Processes</b>	Broaching, Drilling, Etching, Laser Machining, Milling, Turning, Wire EDM, Rapid Prototyping
<b>Material Capabilities</b>	Aluminum, Brass, Bronze, Copper, Hardened Metals, Precious Metals, Stainless Steel, Steel Alloys
<b>Specialized Machining</b>	Yes

## Quality & Process

<b>Surface Finishing</b>	Electroplating
--------------------------	----------------

## Application Areas

### Target Industries

- New Energy Vehicles
- Automotive
- Aerospace
- Medical Equipment
- Electrical Cabinetry
