

Standard Definition Television with CRT Display

This standard definition television features a built-in speaker system and multiple input ports. The television is designed with a white plastic housing and a black bezel around the screen.

Product Overview

Standard Definition CRT Television

This standard definition television features a classic CRT display, providing reliable visual performance for traditional broadcasting needs. Designed with a clean white housing and a contrasting black bezel, it includes integrated speaker systems for standalone audio playback. The unit is equipped with versatile input ports and digital control functions, making it a functional solution for environments requiring legacy display compatibility.
