Product Overview

Reliable Lighting Infrastructure

The Standard Lamp Holder is a robust and efficient solution engineered for both residential and commercial lighting applications. Constructed from durable materials, this holder ensures a stable and secure connection for your light bulbs, promoting long-lasting performance. Its compact design allows for seamless integration into various lighting systems, making it an ideal choice for professional lighting projects.

Technical Specifications

Key Components

- Bakelite housing
- Copper conductive parts
- Aluminum lamp coil

Installation Attributes

Secure locking mechanism • Threaded exterior • Easy installation

Construction Materials

Bakelite, Copper, Aluminum
