

Standard LCD Display Unit

This is a standard LCD display unit with a dark bezel surrounding a gray screen. It is mounted on a circular base with a supporting neck, making it suitable for desktop use.

Overview

Standard LCD Display Unit

This standard LCD display unit is engineered for reliable, general-purpose viewing in professional environments. Featuring a clean, dark bezel design and a stable, circular base with an adjustable neck, it provides a functional and ergonomic solution for desktop workstations. Its conventional aspect ratio makes it an ideal choice for standard office applications, data monitoring, and display tasks requiring consistent image clarity.
